BLAKE RAYVID

hi@blakerayvid.com

PROFESSIONAL PROFILE

Versatile developer with 15+ years in computational problem-solving, specializing in financial analysis, data science and visualization. Architect of predictive models and automated systems that translate complex data into strategic intelligence and operational efficiency.

CORE SKILLS

Programming & Tools:	Python, JavaScript, MATLAB, C++, Java, Git, Shell, Jupyter Notebook, Google Colab, VS Code, XCode
Data Science & Analytics:	NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn, PyTorch, TensorFlow, NLTK, SQL, Google Analytics
Finance & Modeling:	Algorithmic Trading, Quantitative Portfolio Analysis, Backtesting, Option Pricing, Greeks, ThinkScript
Web & Deployment:	Node.js, Express, React, Next.js, Socket.io, Flask, Docker, D3.js, HTML, CSS, Bootstrap, Railway, Netlify
Other Systems:	Microsoft Excel, Google Sheets, Mathematica, LaTeX, Markdown, Regex, SEO, Prompt Engineering

PROFESSIONAL EXPERIENCE

Jul 2025 – Present	Business Analyst, Stealth Fintech – New York, NY - Engineered and backtested ML-driven trading strategies to improve portfolio return predictability. - Conducted quantitative market analysis to refine allocation models and boost strategy efficiency. - Constructed full-stack dashboards for real-time strategy monitoring, reducing decision latency.
Dec 2022 – Jul 2025	Stagehand, The Metropolitan Opera – New York, NY - Managed logistics for 100+ stage productions, streamlining operations and equipment flow. - Optimized real-time setup processes, mitigating bottlenecks to reduce production delays.
Aug 2019 – Dec 2022	Delivery Driver & Route Optimization Developer, Insomnia Cookies – New York, NY - Designed a clustering-based TSP route optimizer in JavaScript, cutting delivery times by 18%. - Analyzed GPS and traffic data to streamline multi-driver dispatch and routing.
Jul 2016 – Aug 2019	JavaScript Developer, City College of New York – New York, NY - Built interactive educational apps in JavaScript to visualize complex math and physics concepts. - Wrote physics simulations adopted by faculty for core undergraduate instruction.

PROJECTS

Polling Platform: Created a full-stack polling platform and dashboard (JS, Flask), analyzing 5,000+ voter inputs for trend analysis.

Image Classifier: Trained a 3-block convolutional neural net (CNN) on the Fashion-MNIST dataset, achieving a 93% test accuracy.

Stock Comparison Tool: Deployed a Python tool to benchmark portfolio returns, visualizing performance with Matplotlib.

Personalized RSS Reader: Developed a custom news aggregator that uses the Gemini API and a topic-weighting algorithm.

EDUCATION

Apr 2024 – Aug 2024	Data Science Immersive Bootcamp, Flatiron School – New York, NY
Jan 2016 – Aug 2019	B.S. in Applied Mathematics (Finance Concentration), Minor in Physics, City College of New York

VOLUNTEER EXPERIENCE

Jan 2022 – Present	Photographer, Hudson West Folk Festival – Jersey City, NJ
Mar 2020 – Oct 2020	Volunteer, Invisible Hands Deliver – New York, NY
